

## Gold Roadmap Trading!

Welcome to your journey! Congratulations on choosing trading as your starting point! You need to spend 30 minutes per day to stay the course! If you want to also do investing at the same time you need to spend 1 hour per day in total (doesn't have to be at the same time).

However, no matter if you are trading or investing you have to go through the **Gold Journey**. Essentially, you will get the IM team's 20,000+ hours in a couple of hours of content. With the Gold Journey in Mind, please follow the outline below to know what to watch and when. Remember, if you have already taken certain steps, just cross them out and keep going. You can go through this journey faster or slower depending on your preference.

Do not forget that we are here to support you in every step of your journey. If you have any questions, please send an email to [gold@investment-mastery.com](mailto:gold@investment-mastery.com).

During this journey you can attend our interactive workshops to fully immerse yourself in the world of investing and trading. You do not need to attend them, they are a bonus but if you want to speed up your learning and take your trading to the next level, the workshops are a must! Booking them will be a part of the tasks in the first week.

For us to propose an ideal journey for you, please fill out the questions in the Wealth Plan about how much profit you want to make, the time you can spend and your starting point. Then we can guide you on your unique journey.

If you get stuck and are not getting the answers to your questions in the webinars, Q&A and accountability sessions, you can also book up to two 1-1 momentum sessions a month with our amazing performance coach.

As you chose the trading journey, we will tell you how you can get access and trade hundreds of thousands of pounds as a prop trader. The best part is that you can get a profit split of up to 90%... All you need to do is learn the skill. In the Gold Course you can watch a module on how it works and how you can get started with it.

Remember, you will learn a few different trading strategies. It is important that you go through all of them and then you choose the strategy that resonates the most with you. All strategies work and you will find out if it works for your personality. You only need **ONE** strategy to make all the money.

**It is now time to start your journey. The weeks below are laid out in a way, so you check off the points, and you have 2 weeks to do so. All you need to do is to put in 30 minutes per day to achieve your financial dreams.**

### Week 1: Getting Started

It is now time to get started. In the onboarding and week 1 you will get organised and learn how to place trades while you are learning. This is important so you can build momentum while you learn.
